MIT APP INVENTOR

Proyectos • Conectar • Generar • Ajustes • Ayuda • Español • [brenda.aranagtz08@gmail.com]

The Challenge

Calling all book nerds (and culture critics of any type): our latest guide challenges you to make an app that collects and shares original reviews of your favorite—or most detested—books.

We were once again inspired by our friends at [YR Media](#), who reported earlier this year on an intriguing subculture: young people on YouTube who make bootleg audiobooks, some with huge followings. Cool, right? But is it legal...? Check out [this story](#) to find out.

And while you're at it, create your very own mobile platform for reviews—yours and your friends'—so that next time you're in the market for a book, you'll know just which titles to pick...and which to skip.

MIT App Inventor 2 interface showing the 'DIYBookClub_Starter' project. The left sidebar contains 'The Challenge' text and a list of categories (Control, Lógica, Matemáticas, Matrices, Texto, Listas, Diccionarios, Colores, Variables, Procedimientos). The main workspace displays a block-based code editor with the following logic:

- Screen1 - Inicializar**
 - ejecutar: poner EscribirBotón - Visible - como falso
 - poner LeerBotón - Visible - como falso
- cuando EscribirBotón - Clic**
 - ejecutar: poner EscribirBotón - Visible - como verdadero
 - poner LeerBotón - Visible - como falso
- cuando PublicarBotón - Clic**
 - ejecutar: llamar CloudDB1 - AgregarValorALista
 - etiqueta: TitleTextBox - Texto
 - elementoAAñadir: TextBox1 - Texto
 - poner TitleTextBox - Texto - como ''
 - poner TextBox1 - Texto - como ''
 - poner DisposiciónVertical1 - Visible - como falso
- cuando LeerBotón - Clic**
 - ejecutar: llamar CloudDB1 - ObtenerListaEtiquetas
 - poner EscribirBotón - Visible - como falso
 - poner LeerBotón - Visible - como verdadero
- cuando CloudDB1 - ListaEtiquetas**
 - valor: ejecutar: poner BooksList - Elementos - como tomar valor

At the bottom, there is a 'Mostrar avisos' button and a 'Política de privacidad y condiciones de uso' link.

MIT App Inventor 2 interface showing the 'DIYBookClub_Starter' project with updated logic. The left sidebar is identical to the previous screenshot. The main workspace displays the following logic:

- cuando PublicarBotón - Clic**
 - ejecutar: llamar CloudDB1 - AgregarValorALista
 - etiqueta: TitleTextBox - Texto
 - elementoAAñadir: TextBox1 - Texto
 - poner TitleTextBox - Texto - como ''
 - poner TextBox1 - Texto - como ''

 - poner LeerBotón - Visible - como verdadero
- cuando CloudDB1 - ListaEtiquetas**
 - valor: ejecutar: poner BooksList - Elementos - como tomar valor
- cuando BooksList - DespuésDeSelección**
 - ejecutar: llamar TinyDB1 - GuardarValor
 - etiqueta: libro
 - valorAGuardar: BooksList - Selección
 - abrir otra pantalla: Nombre de la pantalla: Screen2

At the bottom, there is a 'Mostrar avisos' button and a 'Política de privacidad y condiciones de uso' link.

MIT App Inventor 2 interface showing the "DIYBookClub_Starter" project. The interface includes a left sidebar with "The Challenge" text, a central workspace with a block-based code editor, and a right sidebar with "Screens" and "Diseñador" tabs. The code editor shows logic for initializing variables, fetching book data from a database, and displaying it on the screen. The bottom status bar shows the system clock and battery level.

The Challenge
